CEQA Initial Study - Environmental Checklist Form (Based on the State CEQA Guidelines, Appendix G Rev. 10/98)

1. Project Numbers/Environmental Log Number/Title:

TM 5404, S04-076, Log No. 04-18-009/Valencia Square Condominiums Tentative Map/Site Plan

2. Lead agency name and address:

County of San Diego, Department of Planning and Land Use 5201 Ruffin Road, Suite B, San Diego, CA 92123-1666

3. a. Contact: Greg Konar, Planner/Environmental Specialist

b. Phone number: (858) 495-5873.

E-mail: Greg.Konar@sdcounty.ca.gov.

4. Project location:

The proposed project is located at 8947-8949 and 8961-8963 Valencia Street near the intersection of Bancroft Street in the Spring Valley Community Planning Area of an unincorporated area of the County of San Diego. (APN 503-400-10, 59)

Thomas Brothers Coordinates: Page 1271, Grid A/7

5. Project sponsor's name and address:

Spring Valley Development, LLC Mayfair Homes Chris Vaughn 3443 Camino Del Rio South Suite 312 San Diego, CA 92108 6. General Plan Designation

Community Plan: Spring Valley Land Use Designation: (8) Residential Density: 14.5 du/acre

7. Zoning

Use Regulation: RV15

Density: 14.5 du/acre Special Area Regulation: B, D1, D2

8. Description of project:

The project proposes the construction of 20 new condominium units, each with a two-car garage. The project would have three guest parking spaces and one handicapped space. The project is located on Valencia Street near the intersection of Bancroft Street in the Spring Valley Community Planning Area of an unincorporated area of the County of San Diego.

9. Surrounding land uses and setting:

The surrounding land uses are zoned for multi-family residential in all directions.

10. Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement):

Permit Type/Action	Agency County of Son Diogo
Tentative Map	County of San Diego
County Right-of-Way Permits Construction Permit Excavation Permit Encroachment Permit	County of San Diego
Grading Permit	County of San Diego
Improvement Plans	County of San Diego
Water District Approval	Helix Water District
Sewer District Approval	Spring Valley Sewer District
School District Approval	La Mesa-Spring Valley and
	Grossmont Union School Districts

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED: The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

Aesthetics	Agriculture Resources	Air Quality		
Biological Resources	Cultural Resources	Geology & Soils		
Hazards & Haz. Materials	Hydrology & Water Quality	Land Use & Planning		
Mineral Resources	Noise Noise	Population & Housing		
Public Services	Recreation	✓ Transportation/Traffic		
Utilities & Service Systems	Mandatory Findings of Sign	<u>ificance</u>		
DETERMINATION: (To be completed by the Lead Agency) On the basis of this initial evaluation: On the basis of this Initial Study, the Department of Planning and Land Use finds that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.				
On the basis of this Initial Study, the Department of Planning and Land Use finds that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.				
On the basis of this Initial Study, the Department of Planning and Land Use finds that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

INSTRUCTIONS ON EVALUATION OF ENVIRONMENTAL IMPACTS

- 4 -

- 1. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2. All answers must take account of the whole action involved, including off-site as well as onsite, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4. "Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level.
- 5. Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - a) Earlier Analysis Used. Identify and state where they are available for review.
 - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c) Mitigation Measures. For effects that are "Less than Significant with Mitigation Incorporated," describe the mitigation measures that were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7. The explanation of each issue should identify:
 - a) The significance criteria or threshold, if any, used to evaluate each question; and
 - b) The mitigation measure identified, if any, to reduce the impact to less than significance

Potentially Significant Unless

Mitigation Incorporated

No Impact: State scenic highways refer to those highways that are officially designated. A scenic highway is officially designated as a State scenic highway when the local jurisdiction adopts a scenic corridor protection program, applies to the California Department of Transportation for scenic highway approval, and receives notification from Caltrans that the highway has been designated as an official Scenic Highway. Based on a site visit completed by Jarrett Ramaiya on April 18, 2006, the proposed project is not located near or visible within the same composite viewshed as a State scenic highway and will not change the visual composition of an existing scenic resource within a State scenic highway. Generally, the area defined within a State scenic highway is the land adjacent to and visible from the vehicular right-ofway. The dimension of a scenic highway is usually identified using a motorist's line of vision, but a reasonable boundary is selected when the view extends to the distant horizon. Therefore, the proposed project will not have any substantial adverse effect on a scenic resource within a State scenic highway.

No Impact

Less Than Significant Impact: The proposed project will use outdoor lighting and is located within Zone B as identified by the San Diego County Light Pollution Code,. However, it will not adversely affect nighttime views or astronomical observations,

Discussion/Explanation:

because the project will conform to the Light Pollution Code (Section 59.101-59.115), including the lamp type and shielding requirements per fixture and hours of operation limitations for outdoor lighting and searchlights.

- 7 -

In addition, the proposed project will control outdoor lighting and sources of glare in the following ways:

- 1. The project will not install outdoor lighting that directly illuminates neighboring properties.
- 2. The project will not install outdoor lighting that would cast a direct beam angle towards a potential observer, such as a motorists, cyclist or pedestrian.
- 3. The project will not install outdoor lighting for vertical surfaces such as buildings, landscaping, or signs in a manner that would result in useful light or spill light being cast beyond the boundaries of intended area to be lit.
- 4. The project will not install any highly reflective surfaces such as glare-producing glass or high-gloss surface color that will be visible along roadways, pedestrian walkways, or in the line of sight of adjacent properties.

The project will not contribute to significant cumulative impacts on day or nighttime views because the project conforms to the Light Pollution Code. The Code was developed by the San Diego County Department of Planning and Land Use and Department of Public Works in cooperation with lighting engineers, astronomers. land use planners from San Diego Gas and Electric, Palomar and Mount Laguna observatories, and local community planning and sponsor groups to effectively address and minimize the impact of new sources light pollution on nighttime views. The standards in the Code are the result of this collaborative effort and establish an acceptable level for new lighting. Compliance with the Code is required prior to issuance of any building permit for any project. Mandatory compliance for all new building permits ensures that this project in combination with all past, present and future projects will not contribute to a cumulatively considerable impact. Moreover, the project's additional outdoor lighting and glare is controlled and limits light pollution to the project site or directly around the light source and will not contribute to a cumulative impact. Therefore, compliance with the Code, in combination with the outdoor lighting and glare controls listed above ensure that the project will not create a significant new source of substantial light or glare, which would adversely affect daytime or nighttime views in the area, on a project or cumulative level.

- II. AGRICULTURE RESOURCES -- In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. Would the project:
- a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?

-8-

April 5, 2007

CEQA Initial Study

TM 5404, S04-076, Log No. 04-18-009

No Impact: The project site and surrounding area within radius of 1 mile do not contain any lands designated as Prime Farmland, Unique Farmland, or Farmland of Statewide Importance as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency. Therefore, no Prime Farmland, Unique Farmland, or Farmland of Statewide will be converted to a non-agricultural use.

<u>III. AIR QUALITY</u> -- Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:

		5	' '		
a)	Conflict with or obstruct implementation of the San Diego Regional Air Quality Strategy (RAQS) or applicable portions of the State Implementation Plan (SIP)?				
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
	Disc	cussion/Explanation:			
	antic SIP. crite cont prop addi	s Than Significant Impact: The projections cipated in SANDAG growth projections. Operation of the project will not result tria pollutants listed in the California Amazaminants as identified by the California posed project is not expected to conflict ition, the project is consistent the SAND SIP, therefore, the project will not contract.	used in emalbient Air Rowith e	n development of the RAQS and issions of significant quantities of Air Quality Standards or toxic air esources Board. As such, the either the RAQS or the SIP. In rowth projections used in the RAQS	
b)		ate any air quality standard or contribut juality violation?	e subs	stantially to an existing or projected	
		Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact	
		Potentially Significant Unless Mitigation Incorporated		No Impact	

Less Than Significant Impact: In general, air quality impacts from land use projects are the result of emissions from motor vehicles, and from short-term construction activities associated with such projects. The San Diego County Air Pollution Control District (SDAPCD) has established screening-level criteria for all new source review (NSR) in APCD Rule 20.2. For CEQA purposes, these screening-level criteria can be used as numeric methods to demonstrate that a project's total emissions (e.g. stationary and fugitive emissions, as well as emissions from mobile sources) would not result in a significant impact to air quality. Since APCD does not have screening-level criteria for emissions of volatile organic compounds (VOCs), the use of the screening level for reactive organic compounds (ROC) from the CEQA Air Quality Handbook for the South Coast Air Basin (SCAB), which has stricter standards for emissions of ROCs/VOCs than San Diego's, is appropriate. However, the eastern portions of the county have atmospheric conditions that are characteristic of the Southeast Desert Air Basin (SEDAB). SEDAB is not classified as an extreme non-attainment area for ozone and therefore

has a less restrictive screening-level. Projects located in the eastern portions of the County can use the SEDAB screening-level threshold for VOCs.

The project proposes a 20-unit condominium development. However, grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures. Emissions from the construction phase would be minimal and localized, resulting in pollutant emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the South Coast Air Quality Management District (SCAQMD) CEQA Air Quality Handbook section 6.2 and 6.3. In addition, the vehicle trips generated from the project will result in 160 Average Daily Trips (ADTs). According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are below the Screening-Level Criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA Air Quality Handbook section 6.2 and 6.3 for criteria pollutants. As such, the project will not violate any air quality standard or contribute substantially to an existing or projected air quality violation.

In addition, an Air Quality Analysis, dated June 20, 2005 by Eilar Associates, was prepared for the project and reviewed by DPLU air quality specialist Mario Covic. The Air Quality Analysis supports the above findings that short-term construction impacts and vehicle trips will not violate any air quality standard or contribute substantially to an existing or projected air quality violation.

C)	the proquality	in a cumulatively considerable net in bject region is non-attainment under a standard (including releasing emissione precursors)?	an app	licable federal or state ambient air
		otentially Significant Impact	\checkmark	Less than Significant Impact
	□ Po	otentially Significant Unless litigation Incorporated		No Impact

Less Than Significant Impact: San Diego County is presently in non-attainment for the 1-hour concentrations under the California Ambient Air Quality Standard (CAAQS) for Ozone (O₃). San Diego County is also presently in non-attainment for the annual geometric mean and for the 24-hour concentrations of Particulate Matter less than or equal to 10 microns (PM₁₀) under the CAAQS. O₃ is formed when volatile organic compounds (VOCs) and nitrogen oxides (NO_x) react in the presence of sunlight. VOC sources include any source that burns fuels (e.g., gasoline, natural gas, wood, oil); solvents; petroleum processing and storage; and pesticides. Sources of PM₁₀ in both urban and rural areas include: motor vehicles, wood burning stoves and fireplaces, dust from construction, landfills, agriculture, wildfires, brush/waste burning, and industrial sources of windblown dust from open lands.

Air quality emissions associated with the project include emissions of PM₁₀, NO_x and VOCs from construction/grading activities, and VOCs as the result of increase of traffic from operations at the facility. However, grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures. Emissions from the construction phase would be minimal and localized, resulting in PM₁₀ and VOC emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the South Coast Air Quality Management District (SCAQMD) CEQA air quality handbook section 6.2 and 6.3. The vehicle trips generated from the project will result in 160 Average Daily Trips (ADTs). According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are below the Screening-Level Criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3 for VOCs and PM₁₀.

- 11 -

In addition, a list of past, present and future projects within the surrounding area were evaluated and none of these projects emit significant amounts of criteria pollutants. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. The proposed project as well as the past, present and future projects within the surrounding area, have emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3, therefore, the construction and operational emissions associated with the proposed project are not expected to create a cumulatively considerable impact nor a considerable net increase of PM10, or any O_3 precursors.

d)	Exp	ose sensitive receptors to substantial	l pollutar	nt concentrations?
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Air quality regulators typically define sensitive receptors as schools (Preschool-12th Grade), hospitals, resident care facilities, or day-care centers, or other facilities that may house individuals with health conditions that would be adversely impacted by changes in air quality.

Less Than Significant Impact: The following sensitive receptors have been identified within a quarter-mile (the radius determined by the SCAQMD in which the dilution of pollutants is typically significant) of the proposed project: Child Care Center. However, based on review by the DPLU staff air quality specialist, Mario Covic, this project does not propose uses or activities that would result in exposure of these identified sensitive receptors to significant pollutant concentrations. In

addition, the project will not contribute to a cumulatively considerable exposure of sensitive receptors to substantial pollutant concentrations because the proposed project as well as the listed projects have emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3.

e)	Create objectionable odors affecting a substantial number of people?			
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
	Disc	ussion/Explanation:		
	which hydrodisul How that affect local constants area to XN	h would result from volatile organic comogen sulfide, methane, alcohols, aldehydides dust and endotoxins from the consever, these substances, if present at all 1 μg/m³). Subsequently, no significant act surrounding receptors. Moreover, the lized to the immediate surrounding area siderable odor. A list of past, present are were evaluated and none of these projections. <u>IV.</u> a)	Have any s regio	LOGICAL RESOURCES Would the per a substantial adverse effect, either directly species identified as a candidate, sensitional plans, policies, or regulations, or by the or U.S. Fish and Wildlife Service?	ectly o	or through habitat modifications, on r special status species in local or
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: Based on an analysis of the County's Geographic Information System (GIS) records, the County's Comprehensive Matrix of Sensitive Species, site photos, and a site visit by staff, the site and surrounding area has been determined to contain no native vegetation communities or habitats exist on or adjacent to the site because it has been completely disturbed. Therefore, the project will not have a

substantial adverse effect on any candidate, sensitive, or special status species and would not contribute to cumulative impacts to these designated species.

b)	Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?			
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
	Disc	cussion/Explanation:		
	prop com Prog Con Act, ripar area exte impa	mpact: County staff has conducted a sposed project site does not contain any munities as defined by the County of Sagram, County of San Diego Resource P servation Plan, Fish and Game Code, E or any other local or regional plans, polarian or otherwise sensitive habitat has be proposed for off-site impacts resulting ensions, etc. Therefore, the project is not acts from development on any riparian humity.	riparia an Die rotecti Endan icies d een ic from r ot expe	in habitats or other sensitive natural ego Multiple Species Conservation ion Ordinance, Natural Community gered Species Act, Clean Water or regulations. In addition, no dentified within or adjacent to the road improvements, utility ected to have direct or indirect
c)	Sect	e a substantial adverse effect on federation 404 of the Clean Water Act (includinate), etc.) through direct removal, filling, ans?	ng, bu	t not limited to, marsh, vernal pool,
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: County staff has conducted a site visit and determined that the proposed project site does not contain any wetlands as defined by Section 404 of the Clean Water Act, including, but not limited to, marsh, vernal pool, stream, lake, river or water of the U.S., that could potentially be impacted through direct removal, filling, hydrological interruption, diversion or obstruction by the proposed development. Therefore, no impacts will occur to wetlands defined by Section 404 of the Clean Water Act in which the Army Corps of Engineers maintains jurisdiction over.

Refer to the attached Ordinance Compliance Checklist dated February 2, 2007, for further information on consistency with any adopted Habitat Conservation Plan, Natural Communities Conservation Plan, other approved local, regional or state habitat conservation plan, including, Habitat Management Plans (HMP) Special Area Management Plans (SAMP) or any other local policies or ordinances that protect biological resources including the Multiple Species Conservation Program (MSCP), Biological Mitigation Ordinance, Resource Protection Ordinance (RPO), Habitat Loss Permit (HLP).

V. CULTURAL RESOURCES -- Would the project:

a) Cause a substantial adverse change in the significance of a historical resource as defined in 15064.5?

Jarrett Ramaiya On April 18, 2006, no known unique geologic features were

identified on the property or in the immediate vicinity.

		Initial Study 04, S04-076, Log No. 04-18-009	- 16 -	April 5, 2007
d)	Dist	turb any human remains, including	g those inte	rred outside of formal cemeteries?

	ii. S	Strong seismic ground shaking?		
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

No Impact: The Uniform Building Code (UBC) and the California Building Code (CBC) classifies all San Diego County with the highest seismic zone criteria, Zone 4. However, the project is not located within 5 kilometers of the centerline of a known active-fault zone as defined within the Uniform Building Code's Maps of Known Active Fault Near-Source Zones in California. In addition, the project will have to conform to the Seismic Requirements -- Chapter 16 Section 162- *Earthquake Design* as outlined within the California Building Code. Section 162 requires a soils compaction report with proposed foundation recommendations to be approved by a County Structural Engineer before the issuance of a building or grading permit. Therefore, there will be no impact from the exposure of people or structures to potential adverse effects from strong seismic ground shaking as a result of this project.

- 17 -

iii. S	iii. Seismic-related ground failure, including liquefaction?					
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact			
Disc	cussion/Explanation:					
This In a The from	No Impact: The geology of the project site is identified as Quaternary Alluvium. This geologic environment is not susceptible to ground failure from seismic activity. In addition, the site is not underlain by poor artificial fill or located within a floodplain. Therefore, there will be no impact from the exposure of people to adverse effects from a known area susceptible to ground failure.					
ıv. L	_andslides?					
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact			
Disc	Discussion/Explanation:					

No Impact: The site is not located within a landslide susceptibility zone. Also, staff has determined that the geologic environment of the project area is not located within an area of potential or pre-existing conditions that could become unstable in the event of seismic activity.

- 18 -

April 5, 2007

CEQA Initial Study

No Impact: The project is not located on or near geological formations that are unstable or would potentially become unstable as a result of the project. On a site visit conducted by Jarrett Ramaiya on April 18, 2006, no geological formations or features were noted that would produce unstable geological conditions as a result of the project. For further information refer to VI Geology and Soils, Question a., i-iv listed above.

- 19 -

April 5, 2007

CEQA Initial Study

No Impact: The project will not create a significant hazard to the public or the environment because it does not propose the storage, use, transport, emission, or disposal of Hazardous Substances, nor are Hazardous Substances proposed or currently in use in the immediate vicinity.

b)	O) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

e)) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?				
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
	Disc	ussion/Explanation:			
	Plan does heig helip	mpact: The proposed project is not local (CLUP) for airports; or within two miles not propose construction of any struct ht, constituting a safety hazard to aircraport. Therefore, the project will not constructing in the project area.	of a pure eduction	public airport. Also, the project qual to or greater than 150 feet in /or operations from an airport or	
f)		a project within the vicinity of a private a ty hazard for people residing or working		• •	
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
	Disc	cussion/Explanation:			
	resu	mpact: The proposed project is not with the project will not constitute a safety project area.			
g)		air implementation of or physically interfonse plan or emergency evacuation pla		ith an adopted emergency	
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
	Disc	cussion/Explanation:			

The following sections summarize the project's consistency with applicable emergency response plans or emergency evacuation plans.

i. OPERATIONAL AREA EMERGENCY PLAN:

No Impact: The Operational Area Emergency Plan is a framework document that provides direction to local jurisdictions to develop specific operational area of San Diego County. It provides guidance for emergency planning and requires subsequent plans to be established by each jurisdiction that has responsibilities in a disaster situation. The project will not interfere with this plan because it will not prohibit subsequent plans from being established.

ii. SAN DIEGO COUNTY NUCLEAR POWER STATION EMERGENCY RESPONSE PLAN

No Impact: The San Diego County Nuclear Power Station Emergency Response Plan will not be interfered with by the project due to the location of the project, plant and the specific requirements of the plan. The emergency plan for the San Onofre Nuclear Generating Station includes an emergency planning zone within a 10-mile radius. All land area within 10 miles of the plant is not within the jurisdiction of the unincorporated County and as such a project in the unincorporated area is not expected to interfere with any response or evacuation.

iii. OIL SPILL CONTINGENCY ELEMENT

No Impact: The Oil Spill Contingency Element will not be interfered with because the project is not located along the coastal zone or coastline.

iv. EMERGENCY WATER CONTINGENCIES ANNEX AND ENERGY SHORTAGE RESPONSE PLAN

No Impact: The Emergency Water Contingencies Annex and Energy Shortage Response Plan will not be interfered with because the project does not propose altering major water or energy supply infrastructure, such as the California Aqueduct.

v. DAM EVACUATION PLAN

No Impact: The Dam Evacuation Plan for will not be interfered with because the project is located outside a dam inundation zone.

h) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?

Disc	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated cussion/Explanation:		Less than Significant Impact No Impact

No Impact: The project does not involve or support uses that allow water to stand for a period of 72 hours (3 days) or more (e.g. lagoons, agricultural irrigation ponds). Also, the project does not involve or support uses that will produce or collect animal waste, such as equestrian facilities, agricultural operations (chicken coops, dairies etc.), solid waste facility or other similar uses. Moreover, based on a site visit conducted by Jarrett Ramaiya on April 18, 2007, there are none of these uses on

April 5, 2007

adjacent properties. Therefore, the project will not expose people to significant risk of injury or death involving vectors.

	VIII. HYDROLOGY AND WATER QUALITY Would the project: a) Violate any waste discharge requirements?				
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
	Disc	ussion/Explanation:			
	No Impact: The project does not propose waste discharges that require waste discharge requirement permits, NPDES permits, or water quality certification from the San Diego Regional Water Quality Control Board (SDRWQCB). In addition, the project does not propose any known sources of polluted runoff or land use activities that would require special site design considerations, source control Best Management Practices (BMPs) or treatment control BMPs, under the San Diego Municipal Storm Water Permit (SDRWQCB Order No. 2001-01).				
b)	b) Is the project tributary to an already impaired water body, as listed on the Clean Water Act Section 303(d) list? If so, could the project result in an increase in any pollutant for which the water body is already impaired?			ject result in an increase in any	
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
	Disc	ussion/Explanation:			

Less Than Significant Impact: The project lies in the 909.12/La Nacion hydrologic subarea, within the Sweetwater hydrologic unit - portions of this watershed are impaired for coliform bacteria, metals, sediment toxicity, benthic community degradation.

The project proposes the following activities that are associated with these pollutants: sediments, nutrients, heavy metals, organic compounds, trash and debris, oxygen demanding substances, oil and grease, bacteria and viruses, and pesticides. However, the following site design measures and/or source control BMPs and/or treatment control BMPs will be employed such that potential pollutants will be reduced in any runoff to the maximum extent practicable so as not to increase the level of these pollutants in receiving waters: silt fencing, street sweeping and vacuuming, storm drain inlet protection, stockpile management, gravel bag barriers, stabilized construction entrance/exit, material storage and delivery, spill prevention and control, solid waste management, water conservation practices, paving and

grinding operations, concrete waste management, vehicle and equipment maintenance, any minor slopes created incidental to construction shall be covered with plastic or tarp prior to a rain event and shall have vegetative cover reestablished within 180 days of completion of the slope and prior to building approval, and the use of landscaping and biofilters (new underground system which is conveyed to a bio filter lined catch basin).

- 25 -

The proposed BMPs are consistent with regional surface water and storm water planning and permitting process that has been established to improve the overall water quality in County watersheds. As a result the project will not contribute to a cumulative impact to an already impaired water body, as listed on the Clean Water Act Section 303(d). Regional surface water and storm water permitting regulation for County of San Diego, Incorporated Cities of San Diego County, and San Diego Unified Port District includes the following: Order 2001-01 (NPDES No. CAS 0108758), adopted by the San Diego Region RWQCB on February 21, 2001; County Watershed Protection, Storm Water Management, and Discharge Control Ordinance (WPO) (Ord. No. 9424); County Storm water Standards Manual adopted on February 20, 2002, and amended January 10, 2003 (Ordinance No. 9426). The stated purposes of these ordinances are to protect the health, safety and general welfare of the County of San Diego residents; to protect water resources and to improve water quality; to cause the use of management practices by the County and its citizens that will reduce the adverse effects of polluted runoff discharges on waters of the state; to secure benefits from the use of storm water as a resource; and to ensure the County is compliant with applicable state and federal laws. Ordinance No. 9424 (WPO) has discharge prohibitions, and requirements that vary depending on type of land use activity and location in the County. Ordinance No. 9426 is Appendix A of Ordinance No. 9424 (WPO) and sets out in more detail, by project category, what Dischargers must do to comply with the Ordinance and to receive permits for projects and activities that are subject to the Ordinance. Collectively, these regulations establish standards for projects to follow which intend to improve water quality from headwaters to the deltas of each watershed in the County. Each project subject to WPO is required to prepare a Storm water Management Plan that details a project's pollutant discharge contribution to a given watershed and propose BMPs or design measures to mitigate any impacts that may occur in the watershed.

C)	surfa	Id the proposed project cause or contribace or groundwater receiving water quaseficial uses?		
		Potentially Significant Impact	\checkmark	Less than Significant Impact
		Potentially Significant Unless Mitigation Incorporated		No Impact

Less Than Significant Impact: The Regional Water Quality Control Board has designated water quality objectives for waters of the San Diego Region as outlined in Chapter 3 of the Water Quality Control Plan (Plan). The water quality objectives are necessary to protect the existing and potential beneficial uses of each hydrologic unit as described in Chapter 2 of the Plan.

- 26 -

The project lies in the 909.12/La Nacion hydrologic subarea, within the Sweetwater hydrologic unit that has the following existing and potential beneficial uses for inland surface waters, coastal waters, reservoirs and lakes, and ground water: municipal and domestic supply; agricultural supply; industrial process supply, industrial service supply; contact water recreation; non-contact water recreation; warm freshwater habitat; cold freshwater habitat; wildlife habitat; preservation of biological habitats of special significance; and rare, threatened, or endangered species habitat.

The project proposes the following potential sources of polluted runoff: sediments, nutrients, heavy metals, organic compounds, trash and debris, oxygen demanding substances, oil and grease, bacteria and viruses, and pesticides. However, the following site design measures and/or source control BMP's and/or treatment control BMP's will be employed to reduce potential pollutants in runoff to the maximum extent practicable, such that the proposed project will not cause or contribute to an exceedance of applicable surface or groundwater receiving water quality objectives or degradation of beneficial uses: silt fencing, street sweeping and vacuuming, storm drain inlet protection, stockpile management, gravel bag barriers, stabilized construction entrance/exit, material storage and delivery, spill prevention and control, solid waste management, water conservation practices, paving and grinding operations, concrete waste management, vehicle and equipment maintenance, any minor slopes created incidental to construction shall be covered with plastic or tarp prior to a rain event and shall have vegetative cover reestablished within 180 days of completion of the slope and prior to building approval, and the use of landscaping and biofilters (new underground system which is conveyed to a bio filter lined catch basin).

In addition, the proposed BMPs are consistent with regional surface water, storm water and groundwater planning and permitting process that has been established to improve the overall water quality in County watersheds. As a result, the project will not contribute to a cumulatively considerable exceedance of applicable surface or groundwater receiving water quality objectives or degradation of beneficial uses. Refer to Section VIII., Hydrology and Water Quality, Question b, for more information on regional surface water and storm water planning and permitting process.

d)	Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?			
		Potentially Significant Impact Potentially Significant Unless		Less than Significant Impact
		Mitigation Incorporated	\checkmark	No Impact
	Disc	cussion/Explanation:		
	No Impact: The project will obtain its water supply from the Helix Water District that obtains water from surface reservoirs or other imported water source. The project will not use any groundwater for any purpose, including irrigation, domestic or commercial demands. In addition, the project does not involve operations that would interfere substantially with groundwater recharge including, but not limited to the following: the project does not involve regional diversion of water to another groundwater basin; or diversion or channelization of a stream course or waterway with impervious layers, such as concrete lining or culverts, for substantial distances (e.g. ¼ mile). These activities and operations can substantially affect rates of groundwater recharge. Therefore, no impact to groundwater resources is anticipated.			
∋)	the a	stantially alter the existing drainage pat alteration of the course of a stream or ri stantial erosion or siltation on- or off-site	ver, ir	
		Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact
		Potentially Significant Unless Mitigation Incorporated		No Impact
	Б.			

Less Than Significant Impact: The project proposes 20 condominiums. The proposed project will not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in substantial erosion or siltation on- or off-site. In addition, the contributory watershed is less than 25 acres. In addition, a CEQA preliminary hydrology/drainage study received July 13, 2006, by DPLU was reviewed and accepted by DPW.

As outlined in the Storm water Management Plan (SWMP) received November 30, 2006, and prepared by Lawrence E. Cole of Landmark Engineering, the project will implement the following site design measures, source control, and/or treatment control BMPs to reduce potential pollutants, including sediment from erosion or siltation, to the maximum extent practicable from entering storm water runoff: silt fencing, street sweeping and vacuuming, storm drain inlet protection, stockpile management, gravel bag barriers, stabilized construction entrance/exit, material storage and delivery, spill prevention and control, solid waste management, water conservation practices, paving and grinding operations, concrete waste management, vehicle and equipment maintenance, any minor slopes created incidental to construction shall be covered with plastic or tarp prior to a rain event and shall have vegetative cover reestablished within 180 days of completion of the slope and prior to building approval, and the use of landscaping and biofilters (new underground system which is filtered by a bio filter lined catch basin). These measures will control erosion and sedimentation and satisfy waste discharge requirements as required by the Land-Use Planning for New Development and Redevelopment Component of the San Diego Municipal Permit (SDRWQCB Order No. 2001-01), as implemented by the San Diego County Jurisdictional Urban Runoff Management Program (JURMP) and Standard Urban Storm Water Mitigation Plan (SUSMP). The SWMP specifies and describes the implementation process of all BMP's that will address equipment operation and materials management, prevent the erosion process from occurring, and prevent sedimentation in any onsite and downstream drainage swales. The Department of Public Works will ensure that the Plan is implemented as proposed. Due to these factors, it has been found that the project will not result in significantly increased erosion or sedimentation potential and will not alter any drainage patterns of the site or area on- or off-site. In addition,

- 28 -

f)	the a	stantially alter the existing drainage pa alteration of the course of a stream or ount of surface runoff in a manner whic	river, o	r substantially increase the rate or
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

because erosion and sedimentation will be controlled within the boundaries of the project, the project will not contribute to a cumulatively considerable impact. For further information on soil erosion refer to VI., Geology and Soils, Question b.

Less Than Significant Impact: The proposed project will not significantly alter established drainage patterns or significantly increase the amount of runoff for the following reasons. The proposed project will not significantly alter established drainage patterns or significantly increase the amount of runoff for the following

reasons (based on a CEQA preliminary hydrology/drainage study received July 13, 2006, by DPLU which was reviewed and accepted by DPW):

- 29 -

Drainage will be conveyed to either natural drainage channels or approved drainage facilities, through engineering standards, in order to not significantly alter established drainage patterns and not significantly increase the water surface in watercourses and not significantly increase surface runoff.

Therefore, the project will not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site. Moreover, the project will not contribute to a cumulatively considerable alteration or a drainage pattern or increase in the rate or amount of runoff, because the project will not substantially alter established drainage patterns, or increase the water surface or increase the runoff exiting the site, as indicated above. In addition, the contributory watershed is less than 25 acres. Based on a Drainage Study prepared by Lawrence E. Cole of Landmark Engineering on July 13, 2006:

g)	Create or contribute runoff water which would exceed the capacity of existing or planned storm water drainage systems?			
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
	Disc	cussion/Explanation:		
	Less Than Significant Impact: The project does not propose to create or contribute runoff water that would exceed the capacity of existing or planned storm water drainage systems. The proposed project will not substantially create or contribute runoff water which would exceed the capacity of existing or planned storm water drainage systems. In addition, the contributory watershed is less than 25 acres. In addition, a CEQA preliminary hydrology/drainage study received July 13, 2006, by DPLU was reviewed and accepted by DPW.			
h)	Prov	vide substantial additional sources of po	lluted	runoff?
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
	Disc	cussion/Explanation:		

Less Than Significant Impact: The project proposes the following potential sources of polluted runoff: sediments, nutrients, heavy metals, organic compounds, trash and debris, oxygen demanding substances, oil and grease, bacteria and viruses, and pesticides. However, the following site design measures and/or source control BMPs and/or treatment control BMPs will be employed such that potential pollutants will be reduced in runoff to the maximum extent practicable: silt fencing, street sweeping and vacuuming, storm drain inlet protection, stockpile management, gravel bag barriers, stabilized construction entrance/exit, material storage and delivery, spill prevention and control, solid waste management, water conservation practices, paving and grinding operations, concrete waste management, vehicle and equipment maintenance, any minor slopes created incidental to construction shall be covered with plastic or tarp prior to a rain event and shall have vegetative cover reestablished within 180 days of completion of the slope and prior to building approval, and the use of landscaping and biofilters (new underground system which is conveyed to a bio filter lined catch basin). Refer to VIII Hydrology and Water Quality Questions a, b, c, for further information.

i) Place housing within a 100-year flood hazard area as mapped on a federal Flood

	☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated ussion/Explanation:		Less than Significant Impact No Impact		

Less Than Significant Impact: Although the project site has been classified by the California Department of Conservation – Division of Mines and Geology (Update of Mineral Land Classification: Aggregate Materials in the Western San Diego

Production-Consumption Region, 1997) as an area of undetermined mineral resources MRZ-3, staff has reviewed the site's geologic environment and has determined that the site is not located within an alluvial river valley or underlain by coastal marine/non-marine granular deposits. Therefore, no potentially significant loss of availability of a known mineral resource of value to the region and the residents of the state will occur as a result of this project. Moreover, if the resources are not considered significant mineral deposits, loss of these resources cannot contribute to a potentially significant cumulative impact.

b)	c) Result in the loss of availability of a locally-important mineral resource recovery sidelineated on a local general plan, specific plan or other land use plan?			
		Potentially Significant Impact Potentially Significant Unless		Less than Significant Impact No Impact
	Disc	Mitigation Incorporated ussion/Explanation:	_	•
No Impact: The project site is zoned RV15, which is not consi Extractive Use Zone (S82) nor does it have an Impact Sensitive Designation (24) with an Extractive Land Use Overlay (25) (Co Element, 2000). Therefore, no potentially significant loss of avainneral resource of locally important mineral resource recovery local general plan, specific plan or other land use plan will occuproject.				erlay (25) (County Land Use ant loss of availability of a known curce recovery site delineated on a

		re of persons to or generation of noise local general plan or noise ordinance, or		
		Potentially Significant Impact	\checkmark	Less than Significant Impact
		Potentially Significant Unless Mitigation Incorporated		No Impact
	Disc	ussion/Explanation:		
	Less Than Significant Impact: The project is a condominium construction project. The project will not expose people to potentially significant noise levels that exceed the allowable limits of the County of San Diego General Plan, County of San Diego			

Noise Ordinance, and other applicable standards for the following reasons: The

project is outside all 60 dB(A) contours.

General Plan – Noise Element

The County of San Diego General Plan, Noise Element, Policy 4b addresses noise sensitive areas and requires an acoustical study to be prepared for any use that may expose noise sensitive areas to noise in excess of a Community Noise Equivalent Level (CNEL) of 60 decibels (dBA). Moreover, if the project is excess of CNEL 60 dB(A), modifications must be made to the project to reduce noise levels. Noise sensitive areas include residences, hospitals, schools, libraries or similar facilities where quiet is an important attribute. Project implementation is not expected to expose existing or planned noise sensitive areas to road, airport, heliport, railroad, industrial or other noise in excess of the CNEL 60 dB(A). This is based on staff's review of projected County noise contour maps (CNEL 60 dB(A) contours). Therefore, the project will not expose people to potentially significant noise levels that exceed the allowable limits of the County of San Diego General Plan, Noise Element.

- 34 -

Finally, the project's conformance to the County of San Diego General Plan (Noise Element, Policy 4b and County of San Diego Noise Ordinance (Section 36-404 and 36.410) ensures the project will not create cumulatively considerable noise impacts, because the project will not exceed the local noise standards for noise sensitive areas; and the project will not exceed the applicable noise level limits at the property line or construction noise limits, derived from State regulation to address human health and quality of life concerns. Therefore, the project will not contribute to a cumulatively considerable exposure of persons or generation of noise levels in excess of standards established in the local general plan, noise ordinance, and applicable standards of other agencies.

a)	osure of persons to or generation of endborne noise levels?	excessiv	e groundborne vibration or
	Potentially Significant Impact Less than Significant Impact with Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project proposes residential uses where low ambient vibration is essential for interior operation and/or sleeping conditions. However, the facilities are setback 200 feet from any public road or transit Right-of-Way with projected noise contours of 65 dB or more; any property line for parcels zoned industrial or extractive use; or any permitted extractive uses. A setback of 200 feet ensures that the operations do not have any chance of being impacted by groundborne vibration or groundborne noise levels (Harris, Miller Miller and Hanson Inc., *Transit Noise and Vibration Impact Assessment* 1995). In addition, the setback ensures that the project will not be affected by any past, present or future projects that may support sources of groundborne vibration or groundborne noise.

Also, the project does not propose any major, new or expanded infrastructure such as mass transit, highways or major roadways or intensive extractive industry that could generate excessive groundborne vibration or groundborne noise levels and impact vibration sensitive uses in the surrounding area.

Therefore, the project will not expose persons to or generate excessive groundborne vibration or groundborne noise levels on a project or cumulative level.

b)	A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?			
		Potentially Significant Impact Potentially Significant Unless	$\overline{\checkmark}$	Less than Significant Impact
	Ш	Mitigation Incorporated	Ш	No Impact
	Disc	ussion/Explanation:		
	Less Than Significant Impact: The project involves the following permanent noise sources that may increase the ambient noise level: automobiles. As indicated in the response listed under Section XI Noise, Question a., the project would not expose existing or planned noise sensitive areas in the vicinity to a substantial permanent increase in noise levels that exceed the allowable limits of the County of San Diego General Plan, County of San Diego Noise Ordinance, and other applicable local, State, and Federal noise control. Also, the project is not expected to expose existin or planned noise sensitive areas to noise 10 dB CNEL over existing ambient noise levels based on review of the project by County staff			
	pres that not e exist	project will not result in cumulatively no ent and future projects within in the vici the project in combination with a list of expose existing or planned noise sensiti ting ambient noise levels. c)		bstantial temporary or periodic increase ity above levels existing without the pro		nbient noise levels in the project
		Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact
		Potentially Significant Unless Mitigation Incorporated		No Impact

Less Than Significant Impact: The project does not involve any uses that may create substantial temporary or periodic increases in ambient noise levels in the project vicinity including but not limited to extractive industry; outdoor commercial or industrial uses that involve crushing, cutting, drilling, grinding, or blasting of raw materials; truck depots, transfer stations or delivery areas; or outdoor sound systems.

Also, general construction noise is not expected to exceed the construction noise limits of the County of San Diego Noise Ordinance (Section 36-410), which are derived from State regulations to address human health and quality of life concerns. Construction operations will occur only during permitted hours of operation pursuant to Section 36-410. Also, it is not anticipated that the project will operate construction equipment in excess of 75 dB for more than an 8 hours during a 24-hour period. Therefore, the project would not result in a substantial temporary or periodic increase in existing ambient noise levels in the project vicinity.

d)) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?			
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
	Disc	eussion/Explanation:		
	No Impact: The proposed project is not located within a Comprehensive Land Use Plan (CLUP) for airports or within 2 miles of a public airport or public use airport. Therefore, the project will not expose people residing or working in the project area to excessive airport-related noise levels.			
e)	e) For a project within the vicinity of a private airstrip, would the project expose peopleresiding or working in the project area to excessive noise levels?			
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Mitigation Incorporated

Discussion/Explanation:

No Impact: The proposed project is not located within a one-mile vicinity of a private airstrip; therefore, the project will not expose people residing or working in the project area to excessive airport-related noise levels.

.,,,						
<u>XII</u> a)	II. POPULATION AND HOUSING Would the project: Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?					
		Potentially Significant Impact Potentially Significant Unless		Less than Significant Impact		
	Ш	Mitigation Incorporated	\checkmark	No Impact		
	Disc	ussion/Explanation:				
	No Impact: The proposed project will not induce substantial population growth in a area because the project does not propose any physical or regulatory change that would remove a restriction to or encourage population growth in an area including, but limited to the following: new or extended infrastructure or public facilities; new commercial or industrial facilities; large-scale residential development; accelerated conversion of homes to commercial or multi-family use; or regulatory changes including General Plan amendments, specific plan amendments, zone reclassifications, sewer or water annexations; or LAFCO annexation actions.

No Impact

April 5, 2007

Discussion/Explanation:

No Impact: The proposed project will not displace a substantial number of people since the site is currently vacant.

XIII. PUBLIC SERVICES

- a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance service ratios, response times or other performance objectives for any of the public services:
 - i. Fire protection?
 - ii. Police protection?
 - iii. Schools?
 - iv. Parks?
 - v. Other public facilities?

Potentially Significant Impact		Less than Significant Impact
Potentially Significant Unless Mitigation Incorporated	V	No Impact

Discussion/Explanation:

No Impact: Based on the service availability forms received for the project, the proposed project will not result in the need for significantly altered services or facilities. Service availability forms have been provided which indicate existing services are available to the project from the following agencies/districts: Helix Water District, Spring Valley Sanitation District, San Miguel Consolidated Fire Protection District, Grossmont Union School District, La Mesa-Spring Valley School District. The project does not involve the construction of new or physically altered governmental facilities including but not limited to fire protection facilities, sheriff facilities, schools, or parks in order to maintain acceptable service ratios, response times or other performance service ratios or objectives for any public services. Therefore, the project will not have an adverse physical effect on the environment because the project does not require new or significantly altered services or facilities to be constructed.

XIV. RECREATION

a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

CEQA Initial Study TM 5404, S04-076, Log No. 04-18-009	- 39 -	April 5, 2007
☐ Potentially Significant Impact		Less than Significant Impact
Potentially Significant Unless Mitigation Incorporated		No Impact

Discussion/Explanation:

Less Than Significant Impact: The project involves a residential 1-lot subdivision that will increase the use of existing neighborhood and regional parks or other recreational facilities. To avoid substantial physical deterioration of local recreation facilities the project will be required to pay fees or dedicate land for local parks to the County pursuant to the Park Land Dedication Ordinance (PLDO). The Park Land Dedication Ordinance (PLDO) is the mechanism that enables the funding or dedication of local parkland in the County. The PLDO establishes several methods by which developers may satisfy their park requirements. Options include the payment of park fees, the dedication of a public park, the provision of private recreational facilities, or a combination of these methods. PLDO funds must be used for the acquisition, planning, and development of local parkland and recreation facilities. Local parks are intended to serve the recreational needs of the communities in which they are located. The proposed project opted to pay the fees. Therefore, the project meets the requirements set forth by the PLDO for adequate parkland dedication and thereby reducing impacts, including cumulative impacts to local recreational facilities. The project will not result in significant cumulative impacts, because all past, present and future residential projects are required to comply with the requirements of PLDO. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

There is an existing surplus of County Regional Parks. Currently, there is over 21,765 acres of regional parkland owned by the County, which far exceeds the General Plan standard of 15 acres per 1,000 population. In addition, there are over one million acres of publicly owned land in San Diego County dedicated to parks or open space including Federal lands, State Parks, special districts, and regional river parks. Due to the extensive surplus of existing publicly owned lands that can be used for recreation the project will not result in substantial physical deterioration of regional recreational facilities or accelerate the deterioration of regional parkland. Moreover, the project will not result any cumulatively considerable deterioration or accelerated deterioration of regional recreation facilities because even with all past, present and future residential projects a significant surplus of regional recreational facilities will remain.

b) Does the project include recreational facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effect on the environment?

CEQA Initial Study TM 5404, S04-076, Log No. 04-18-009		- 40 -		April 5, 2007

 XV. TRANSPORTATION/TRAFFIC Would the project: a) Cause an increase in traffic which is substantial in relation to the existing traffic loand capacity of the street system (i.e., result in a substantial increase in either the number of vehicle trips, the volume to capacity ratio on roads, or congestion at intersections)? 				relation to the existing traffic load substantial increase in either the	
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	_	√	Less than Significant Impact No Impact
	Disc	ussion/Explanation:			
	Less Than Significant: The project will generate approximately an additional 160 ADT which (per SANDAG traffic rates: 20 units times 8 ADT per unit = 160 ADT). The project was reviewed by DPW and was determined not to result in direct impacts, a substantial increase in the number of vehicle trips, volume of capacity ratio on roads, or congestion at intersections in relation to existing conditions for the following reasons:				
	serv be b	ice on Valencia Street is better th	an "C".	The	encia Street. The existing level of level of service with the project will of 160 ADT will not be a substantial
	DPL	ddition, a review of the Traffic Let U which was reviewed and accep acts.	•		

b) Exceed, either individually or cumulatively, a level of service standard established by the County congestion management agency for designated roads or highways?
 Potentially Significant Impact
 Potentially Significant Unless
Mitigation Incorporated
 No Impact

Discussion/Explanation:

Potentially Significant Unless Mitigation Incorporated: The County of San Diego has developed an overall programmatic solution that addresses existing and projected future road deficiencies in the unincorporated portion of San Diego County. This program includes the adoption of a Transportation Impact Fee (TIF) program to fund improvements to roadways necessary to mitigate potential cumulative impacts caused by traffic from future development. Based on SANDAG regional growth and land use forecasts, the SANDAG Regional Transportation Model was utilized to analyze projected build-out (year 2030) development conditions on the existing circulation element roadway network throughout the unincorporated area of the County. Based on the results of the traffic modeling, funding necessary to construct transportation facilities that will mitigate cumulative impacts from new development was identified. Existing roadway deficiencies will be corrected through improvement projects funded by other public funding sources, such as TransNet, gas tax, and grants. Potential cumulative impacts to the region's freeways have been addressed in SANDAG's Regional Transportation Plan (RTP). This plan, which considers freeway buildout over the next 30 years, will use funds from TransNet, state, and federal funding to improve freeways to projected level of service objectives in the RTP.

The proposed project generates approximately an additional 160 ADT. These trips will be distributed on circulation element roadways in the County that were analyzed by the TIF program, some of which currently or are projected to operate at inadequate levels of service. These project trips therefore contribute to a potential significant cumulative impact and mitigation is required. The potential growth represented by this project was included in the growth projections upon which the TIF program is based. Therefore, payment of the TIF, which will be required at issuance of building permits, in combination with other components of the program described above, will mitigate potential cumulative traffic impacts to less than significant.

c) Result in a change in air traffic patterns, including either an increase in traffic or a change in location that results in substantial safety risks?					
		Potentially Significant Impact		Less than Significant Impact	
		Potentially Significant Unless Mitigation Incorporated	\checkmark	No Impact	

No Impact: The proposed project will not result in inadequate emergency access. The project is not served by a dead-end road that exceeds the maximum cumulative length permitted by the Consolidated Fire Code for the 17 Fire Protection Districts in San Diego County; therefore, the project has adequate emergency access.

f) Result in inadequate parking capacity?

Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact
Potentially Significant Unless Mitigation Incorporated		No Impact

Discussion/Explanation:

Less Than Significant Impact: The Zoning Ordinance Section 6758 Parking Schedule requires two on-site parking spaces for each dwelling unit. The proposed lots have sufficient area to provide at least two on-site parking spaces consistent with the Zoning Ordinance.

b)	or ex			r or wastewater treatment facilities in of which could cause significant
		Potentially Significant Impact		Less than Significant Impact
		Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact

Discussion/Explanation:

No Impact: The project does not include new or expanded water or wastewater treatment facilities. In addition, the project does not require the construction or expansion of water or wastewater treatment facilities. Based on the service availability forms received, the project will not require construction of new or expanded water or wastewater treatment facilities. Service availability forms have been provided which indicate adequate water and wastewater treatment facilities are available to the project from the following agencies/districts: Helix Water District and the Spring Valley Sanitary Maintenance District. Therefore, the project will not require any construction of new or expanded facilities, which could cause significant environmental effects.

- 44 -

c)	c) Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?			<u> </u>
	P(otentially Significant Impact otentially Significant Unless itigation Incorporated		Less than Significant Impact No Impact
Discussion/Explanation:				
Less Than Significant Impact: The project involves new storm water drain facilities. Refer to the Storm water Management Plan received November 3 for more information. However, as outlined in this Environmental Analysis F Section I-XVII, the new facilities will not result in adverse physical effect on environment.				Plan received November 30, 2006 Environmental Analysis Form adverse physical effect on the

	P(otentially Significant Impact otentially Significant Unless itigation Incorporated		Less than Significant Impact No Impact
Discussion/Explanation:				
		Than Significant Impact: The project		

Less Than Significant Impact: The project requires water service from the Helix Water District. A Service Availability Letter from the Water District has been provided, indicating adequate water resources and entitlements are available to serve the requested water resources. Therefore, the project will have sufficient water supplies available to serve the project.

Mitigation Incorporated

Discussion/Explanation:

Less than Significant Impact: Implementation of the project will generate solid waste. All solid waste facilities, including landfills require solid waste facility permits to operate. In San Diego County, the County Department of Environmental Health, Local Enforcement Agency issues solid waste facility permits with concurrence from the California Integrated Waste Management Board (CIWMB) under the authority of the Public Resources Code (Sections 44001-44018) and California Code of Regulations Title 27, Division 2, Subdivision 1, Chapter 4 (Section 21440et seq.). The project will deposit all solid waste at a permitted solid waste facility and therefore, will comply with Federal, State, and local statutes and regulations related to solid waste.

XVII. MANDATORY FINDINGS OF SIGNIFICANCE:

a)	subs popi anin plan	s the project have the potential to degrestantially reduce the habitat of a fish or ulation to drop below self-sustaining leveral community, reduce the number or retor animal or eliminate important examony or prehistory?	wildlife els, the estrict	e species, cause a fish or wildlife reaten to eliminate a plant or the range of a rare or endangered
		Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact
		Potentially Significant Unless Mitigation Incorporated		No Impact

Discussion/Explanation:

Per the instructions for evaluating environmental impacts in this Initial Study, the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory were considered in the response to each question in sections IV and V of this form. In addition to project specific impacts, this evaluation considered the projects potential for significant cumulative effects. There is no substantial evidence that there are biological or cultural resources that are affected or associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.

b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?

CEQA Initial Study TM 5404, S04-076, Log No. 04-18-009	- 47 -	April 5, 2007
Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

The following list of past, present and future projects were considered and evaluated as a part of this Initial Study:

PROJECT NAME	PERMIT/MAP NUMBER
Highlands Ranch	TM 5299
Cingular – Jim Merserau	MUP 66-012
Asmar	MUP 99-022
New Life Church	MUP 72-061

Davidson Cremoatorium	S93-022
Ateffi	S03-041
Coronado Complex Site Plan	S03-076
10-lot Condo Site Plan	S04-050
Kevin's Auto Body	S04-065
Welsh TM	SP 03-003

Per the instructions for evaluating environmental impacts in this Initial Study, the potential for adverse cumulative effects were considered in the response to each question in sections I through XVI of this form. In addition to project specific impacts, this evaluation considered the projects potential for incremental effects that are cumulatively considerable. As a result of this evaluation, there were determined to be potentially significant cumulative effects related to traffic. However, mitigation has been included that clearly reduces these cumulative effects to a level below significance. This mitigation includes payment of the Transportation Impact Fee

(TIF). As a result of this evaluation, there is no substantial evidence that, after mitigation, there are cumulative effects associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.

c)	c) Does the project have environmental effects, which will cause substantial advers effects on human beings, either directly or indirectly?					
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		

Discussion/Explanation:

In the evaluation of environmental impacts in this Initial Study, the potential for adverse direct or indirect impacts to human beings were considered in the response to certain questions in section XV. Transportation and Traffic. As a result of this evaluation, there were determined to be potentially significant effects to human beings related to the following: traffic. However, mitigation has been included that clearly reduces these effects to a level below significance. This mitigation includes payment of the Transportation Impact Fee (TIF). As a result of this evaluation, there is no substantial evidence that, after mitigation, there are adverse effects to human beings associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.
